

ENV 797 - Time Series Analysis for Energy and Environment Applications | Spring 2026

Assignment 1 - Due date 01/15/26

Abrao Soares Pereira

Directions

Before making any edits to this file, please rename it such that it includes your first and last name (e.g., “LuanaLima_TSA_A01_Sp26.Rmd”)

Once you have this renamed file open in RStudio, the first thing you will do is replace “author:” on line 3 with your name. Then you will start working through the assignment by **creating code and output** that answer each question. Be sure to use this assignment document. Your report should contain the answer to each question and any plots/tables you obtained (when applicable).

When you have completed the assignment, **Knit** the text and code into a single PDF file. Submit this pdf using Canvas.

Questions

Q1. What are your previous experiences with time series analysis, R, and Git?

Answer: I don't have any experiences with time series analysis, but I do have experiences in r and Git from Introduction to Data Exploration class in the fall semester 2025 for my EAM concentrations requirement.

Q2. For this part we just want to see the path to your R project. No need to do anything. The output will be automatically generated once you knit you file.

Answer: This is my working directory:

```
getwd()
```

```
## [1] "/Users/abraopereira/Documents/ENVIRON 797 /Exercise_and_Assignments/Class_Exercise_and_Assignme
```

Q3. Copy and paste the link to your forked repository on Github. It should looks like this: “https://github.com/lmmlima/TSA_Sp26”

Answer: https://github.com/abraosp/TSA_Sp26
